

# IRA IT Solutions Inc.

Innovative || Reliable || Achievable

---

## Introduction

IRA IT Solutions Inc. is a MN (Twin Cities) based corporation - owned and operated by Computer Science graduates/professionals with 17 years of experience in Software Development Life Cycle. We have been providing IT services to major Public-Sector, Financial, Health Care, Retail and Sales organizations in the Minneapolis – St. Paul area.

## Our Unique Qualifications

IRA IT Solutions takes pride in being a "One Stop Shop" for our clients, meaning that owners itself are specialized in Information Technology field and assist clients with various roles in different tools and technologies. We also secure resources in many areas (if needed) from our computer science professional network to meet our clients need. As such, we are able to support our clients holistically as their needs evolve over the years.

### Software Tools and Technologies

- Oracle – SQL and PL/SQL
- Microsoft SQL Server – SQL and T-SQL
- Microsoft SQL Server Integration Services
- Microsoft SQL Server Reporting Services
- Microsoft Power Platform Tools
- IBM DataStage
- Hyperion Essbase and Planning
- Anaplan
- Autosys, Active Batch and Automic

### Vendor-Based Systems

- Infor Public Sector (IPS)
- Oracle Retail (Merchandising and Pricing)
- SAP Power Designer (Business Process Model)

## Our Approach

IRA IT Solutions approach combines our deep knowledge in computer science and our extensive software development experience. This approach has produced number of successful projects that have been delivered on time and within budget. IRA IT Solutions has a record of success at all project assignments. For majority of the roles, one of the owners from IRA IT Solutions works directly as a Consultant or one of the owners works closely with other staff/contract resources. Thus, we assure that our organization and/or management is directly involved until the successful completion of the project assignment.
